Holly,

We do have some OCSPP specific activities we can mention on this chemistry.

There are 2 bullets that may be useful to add to what you have. If space is limited, I would go with just the first one.

- EPA also has taken a number of regulatory actions under TSCA to limit any future manufacture or import of certain perfluorinated chemicals. Since 2000, EPA has published Significant New Use Rules (SNURs) impacting several hundred chemicals in these classes.
- EPA is taking further steps to protect public health by ensuring the safety of pre-market alternatives to PFOA and PFOS through its New Chemical Review Program.

Attached is a one pager from OCSPP, but I think you have the critical pieces in the existing fact sheet. If you could add the one bullet, that would help.

Thanks!
